Date of birth: 02/04/1997 | **Nationality:** Bangladeshi | **Gender:** Male | **Phone number:** (+358) 449705457 (Mobile) | **Email address:** shamitaditta380@gmail.com | **Website:** https://shamitahmed.github.io/ | **LinkedIn:** www.linkedin.com/in/shamitahmed |

Address: klaneettietie 1C 093, 00420, Helsinki, Finland (Home)

ABOUT ME

I am a multidisciplinary programmer with 4 **years of game industry experience,** recently completed my MSc. degree **with honours** in Computer, Communication and Information Sciences(CCIS), majoring in **Game Design and Development** and minoring in **Virtual Reality** at **Aalto University**, Finland.

Engaging video games, immersive-interactive media and breathtaking tech of various forms have always been my motivation to achieve more. I am currently focusing on Virtual Reality and Computer Vision-based Locomotion and Exergames that encourage physical movement.

WORK EXPERIENCE

RESEARCH ASSISTANT – AALTO UNIVERSITY – 01/01/2025 – 31/12/2025 – ESPOO, FINLAND

Website: https://www.aalto.fi/en/department-of-art-and-media/game-research-group

Contributed as a Research Assistant in the **Game Research Group** led by Prof. Perttu Hämäläinen at Aalto University. During my tenure I have worked on one first author and three co-authored research papers currently in-review at conferences such as CHI 2026 and CHIPLAY 2026. My contribution in these papers include my own thesis work, active VR game development, running user study, qualitative data coding and analysis, in-depth testing and analysis of a novel game design tool etc.

SUMMER RESEARCH INTERN – AALTO UNIVERSITY – 03/06/2024 – 31/10/2024 – ESPOO, FINLAND

I worked on an augmented reality and computer vision-based indoor navigation system, primarily during a summer internship at the Department of Computer Science at Aalto University.

SENIOR GAME DEVELOPER – PLAYENSE – 05/09/2022 – 31/05/2023 – DHAKA, BANGLADESH

My responsibilities included:

- Developing games using the unity 3D game engine for IOS and Android platforms
- Writing high-quality and reliable source code, creating prototypes from internal concepts, and contributing new ideas
- Working with product managers, game designers, and artists to complete projects
- Providing mentorship and guidance to junior developers

GAME DEVELOPER – FREE PIXEL GAMES LTD. – 10/09/2019 – 04/09/2022 – DHAKA, BANGLADESH

My responsibilities included:

- Cross-platform game design, development and project management, integrating third party networking and analytics related plugins
- Dynamic and reusable code creation, memory and performance optimization

EDUCATION AND TRAINING

01/08/2023 – 30/12/2025 Espoo, Finland

MSC IN COMPUTER, COMMUNICATION AND INFORMATION SCIENCES (CCIS) Aalto University

Website https://www.aalto.fi/en | **Field of study** Major in Game Design and Development, Minor in Virtual Reality | **Final grade** 4.4 / 5 |

Thesis Exploring a novel human quadruped locomotion technique for embodied interaction

2015 – 2019 Dhaka, Bangladesh
BSC IN COMPUTER SCIENCE AND ENGINEERING(CSE) Ahsanullah University of Science and Technology

Activities and societies: Joint Secretary, AUST Innovation and Design Club (AUSTIDC) Programming Competition, Software Showcasing and Hackathons

Website https://www.aust.edu/ | **Field of study** CSE | **Final grade** Grade: 3.05 / 4.00 |

Thesis Automatic dMRI Segmentation of Human Brain using Machine Learning Techniques

PROJECTS

Master´s Thesis: Exploring a novel human quadruped locomotion technique for embodied interaction

Embodying non-human characters and exercising abdominal muscles are both underexplored in exergames. We address this by describing the design and evaluation of a novel human quadruped locomotion exergame. In the game, the player lies supine on the ground and moves their arms and legs to control a quadrupedal character (a tiger), similar to common bodyweight abdominal muscle exercises such as the Bicycle Crunch. The motion tracking is vision-based, utilizing a Kinect sensor placed above the player, which makes our approach suitable for commercial premises such as indoor activity parks where a system needs to run unattended and without any wearable components. Our system extends embodied interaction beyond traditional bipedal or controller-based systems, demonstrating how natural limb movements can generate responsive and immersive quadrupedal motion within virtual environments. We conducted a user study (N=15) to evaluate the system's intuitiveness, control, and overall player experience. The findings demonstrate the usability and potential of our system, highlighting its intense physical nature. Participants reported that gameplay immersion masked physical exertion, allowing them to perceive rigorous core training primarily as play.

Idle Sea Cleaner - A 3D Topdown Game made using Unity

A topdown 3D game where your primary objective is to clean the sea by collecting different types of trash. Unlock new items, explore new areas and upgrade your ship while at it!

My Contributions: Solo Programmer, Game Designer
Play Store Link: https://play.google.com/store/apps/details?id=idle.sea.cleaner

Monster Cleaning Inc. - A 2D Game made using Unity Engine

Welcome to Monster Cleaning Inc., located in the heart of an RPG world! After nasty battles, these monsters need a good scrub. You need to use the right-sized sponge to clean it. Your cleaning skills will be judged by the monsters themselves, and their ratings will determine your success.

My Contributions: Gameplay, UI programming, Game Design, Polish

Unreality - A VR Game made using Unity Engine

VR experience exploring the boundary between real and virtual spaces, evoking distinct emotions through interactive environments. Using geospatial 3D data and hand-crafted worlds, we designed four areas that elicit relaxation, anxiety, joy, and nostalgia. The project blends architecture and game design to challenge perceptions of reality.

My Contributions: Gameplay, UI Programming, Lighting, Post-Processing, Game Design, Production Management

Thoughts Out! - A 3D Platformer Game made using Unreal Engine 5

Thoughts Out! is set in a dreamlike world where your everyday office troubles morph into an annoying dragon. This dragon can alter the surrounding environment, making your adventure either easier or more challenging. How can you drive it out of your daydream and reclaim peace of mind?

My Contributions: Programmer, Level Designer

C | C++ | C# | Java | Python | mySQL | Matlab | PHP | JS | ASP.Net | JavaScript

Softwares and IDE

Unity | Unreal Engine 5 | Sourcetree | GitHub | Eclipse | Visual Studio | Jupyter Notebook | Blender | Adobe illustrator

HONOURS AND AWARDS

10/2016
Champion-Game Development-IUT ICT FEST 2016 – Islamic University of Technology

02/2018
Champion-Software-Intra AUST Technomania 2018 – AUST CSE Society

12/2017
Champion-Game Development-National RoboTech Fest 2017 – Engineering Students Association of Bangladesh(ESAB)

11/2018
1st Runner Up in Networking War- International Telco Warfare 2018 – East West University

05/2017
Top 25- Grameenphone Game Jam 2017 – Issued by Grameenphone Whiteboard

VOLUNTEERING

01/10/2023 – 31/05/2024 Games Now!
Event Organizer and Community Manager

Games Now! is an open lecture series by Aalto University. I have contributed to the production team as a Community Track 2023-2024 member.

01/2020 AUST Innovation and Design Club
Instructor for "Workshop on Game Development 2.0"

Had the privilege of taking a workshop on Game Development on Jan 31, 2022 for the young learners at AUST IDC! It was a fun 1.5 hour long session discussing news about the game dev industry, trying to give a basic idea about game design, development, deployment and programming.

10/2018 – 01/2019 MindSparks'19
Event Organizer, Segment Coordinator (Software Showcase), Graphic Designer

We, AUST Innovation and Design Club, Ahsanullah University of Science and Technology, Bangladesh, hosted an International Technology and business oriented event called MindSparks'19 on 30-31st January, 2019. I was responsible for overseeing software showcasing segment, managing accounts, logistics and designing majority of the event graphics.

05/2020 – 06/2020 Shilpanudan
Co-Founder, Artist

Me alongside some artist friends took the initiative of creating art for clients and donating all the income towards welfare of poverty-stricken people during the peak of COVID-19 pandemic. We were able to collect and donate almost $1000 worth of food and medicine during a period of one month.
